

Lékařské a biologické vědy

Pořadí uchazečů v panelu po 2. kole soutěže

<i>Reg. ID</i>	<i>Skóre</i>	<i>Postupuje</i>	<i>Název projektu</i>
U3072	94,25	ANO	Quantum Chemical Analysis of Nucleic Acids aimed at the Reparametrization of the parm99 Force Field
U3087	92,5	ANO	Spatio-temporal dynamics of protein-protein interactions in Wnt signaling pathway
U3027	91,35	ANO	Detailed functional characterization of <i>Aspergillus fumigatus</i> L-fucose specific lectin
U3081	90,5	ANO	The role of the oxidative state in structure and function of proteins: relation to the metal-based drugs and malignant tumour diseases
U2965	90	ANO	Regulation of structure specific endonucleases in DNA repair
U3092	86,5	ANO	Study of glycosyltransferases and their role in progress of cancer
U2963	85,25	ANO	Diagnostic biosensors for encephalopathy caused by prions
U3053	83,5	ANO	Úloha genetických abnormalit ve vývoji a progresi monoklonální gamapatie nejasného významu
U3082	82,5	ANO	Analysis, characterization and use of gold nanoparticles: Application in Bio-analytical chemistry and nano-medicine
U2961	82,2	ANO	A Novel synthetic Approach of Biological active substituted 1,2,3- Triazoles and 1,2,3,5-Tetrazoles from Acyl azides...
U3021	81,5	ANO	Study of Interactions of Proteins of the Cytokinin Pathway Studied by NMR Spectroscopy
U3089	80,7	ANO	Determination of coronary non-infarct related artery stenosis in patients with acute myocardial infarction
U3048	80	ANO	Structural and functional analysis of telomerases
U2971	78,75	ANO	Structural basis for the recognition of directing elements involved in snRNA gene transcription termination in human
U3066	78,25	ANO	Molecular mechanisms of metastasis in breast cancer: Integrated genomics and proteomics approaches
U3030	76	ANO	Molecular characterization of Spo11 protein and its role in meiotic recombination
U3069	76	ANO	Mutational analysis of relevant prognostic markers of chronic lymphocytic leukemia
U3025	75	ANO	Recognition of <i>Salmonella</i> mutants modified in surface structures by porcine immune system
U2991	73,75	NE	Signalling mechanisms involved in regulation of water use in hop plants
U3088	73	NE	Prenylované polyfenoly - struktura a biologická aktivita

U3040	68,9	NE	Milk and dairy products like the source of important organic bioindicators
U2973	68,5	NE	Therapeutic potential of the inhibition of stress-induced signaling in malignant melanoma cells
U2967	68,4	NE	Iatrogenní poškození zubní skloviny při běžných stomatologických úkonech u psů
U3051	68	NE	Protection of Cells from Free Radical Damage by Plant Secondary Metabolites
U3074	67,9	NE	IVIVC (in-vitro in-vivo correlation), prediction of bioavailability with use of special multicompartmental apparatus
U2999	66,6	NE	Changes of structure of the tympanic membrane during its transformation to retraction pocket in children.
U3054	66	NE	Genetic variation of pathogens in relation to immune genes of host in Mice Hybrid Zone'.
U3059	65,25	NE	Is the segregation of chromosomes in homoploid hybrids the reason for intraspecific genome size variation?
U3085	64,75	NE	Mucoadhesive patches for oral application
U3050	64,5	NE	Kvalita života u nemocných s atopickou dermatitidou
U3049	64	NE	Pharmacogenomic indicators in patients with Crohn's disease resistant to biological therapy
U2995	63,3	NE	The interplay between Chromatin Assembly Factor and telomere maintenance in Arabidopsis thaliana model plant
U3086	58,5	-	Factors Regulating Intracellular Localization of Proteins and Their Role in the Hormonal Signal Transduction in Plants
U3070	58,25	-	Detekce genových polymorfismů v genech pro thiopurin S-methyl transferázu, inosintrifosfát-pyrofosfatázu a xanthinoxidázu...
U3009	57,5	-	Farmakogenetika diabetické choroby ledvin - možný individuální terapeutický přístup k pacientům na základě znalosti genetické variability RAAS
U3024	48,75	-	Identifikace a funkční charakterizace mikroRNA spojených s molekulární patologií multiformního glioblastomu
U3080	41,75	-	Biodegradable microparticles for controlled release of drug
